
Caractéristiques

- **Lieu** : Hakkari, Turquie
- **Orientation** : Ouest
- **Hauteur** : 800m (?)
- **Matériel** : "There are 2 options for jumping. For one, you don't need any gear but exit is a little bit positive in that case. From the upper exit, there is a minor ledge 5 at meters below. But if you go with the rope and repel down 5 meters, it is definitely positive and safe."
- **Posé** : "It is a normal size field at a little bit left side of the exit."
- **Première** : Cengiz Kocak in 2019

Acces: 1:30h

Exit Coordonnées GPS: 37.27049, 43.60463

"The best way is to get in contact with security forces, and locals before you go there. Because ares is known for terrorist activities for 40 years. So everything you do in there is sensitive. Getting in contact with the little governor office is the best way to start the adventure. Because without his support, you can not even enter the town. Approach: If you have little governor's support then he will also support you with one army unit and truck then you will have to hike with them to the top. Because they not only make sure that you are safe, but also check for the land mines. So hiking with that team after the drive takes like one and a half hour. Because they carry heavy backpacks."

Terrain Profile: From the upper exit, there is a minor ledge 5 at meters below. But if you go with the rope and repel down 5 meters, it is definitely positive and safe. Exit is 180 meters rock drop and then easily flyable to the landing. You can even do some flyby at the left side of the valley at the front of you. Or you can go deep in the valley before flare and deployment.
