
Caractéristiques

- **Lieu** : Samsun, Turquie
- **Orientation** : Nord
- **Hauteur** : 415m
- **Matériel** : Rien
- **Posé** : "You ll either have to wait for event for floating platfom, or you mll have to land boat. Depth of the river is 120 meters. So not recommended. Return Trip: Only by boat. Muhittin can arrange everything."
- **Première** : This exit has been opened by **Cengiz Kocak** in 2016. There have been 2 events to this day and almost 50 different base jumper has done many jumps in those 2 events.

Acces: 0:30m

Exit Coordonnées GPS: 41.27886, 35.40482

"First, you have to reach the Sahinkaya Kanyon by car then there is a boat and captain named Muhittin. He'll give you a ride to the other side of the reservoir and you need a ride with the car almost 20 mins to the start point of hiking. With a really light hike, you ll reach the exit in 30 mins but to find the exit for the first time, you need Muhittin's help. Approach: It is like a walk on the park. Maybe at the last 50 meters, you'll have to deal with bushes."

Terrain Profile: 324 meters to the Talus and 415 to the reservoir. yes there is no land for landing.
